

# Risk Management Plan

www.safefarmswa.net.au

**SAFEFARMSWA**  
SINCE 1994

Item No.	Description of identified hazards	Matrix risk level	Possible treatment options	Treatment Strategy (Hierarchy of Control)	Matrix risk level after treatment	By When	Who	How monitored?

## Risk Mitigation Strategies

### Accept the risk

- The risk might be so small the effort and expense to mitigate it is not worthwhile

### Avoid the risk

- Take action to remove it (for example, switch to a more reliable supplier)

### Mitigate the risk

Take action to reduce the risk to an acceptable level by lessening the impact or chance of the risk occurring

When that strategy relates to availability of resources, draw up an agreement and get sign-off for them

### Reject unacceptable risks

- Find another way to achieve that particular objective

### Transfer the risk

- Make someone else responsible
  - make a person responsible for a particularly risky part of a project
  - outsource an activity, or subcontract an activity

Impact	How likely is it to occur?		
	Could happen at any time	Could happen sometime	Could happen, but very rarely
How severely could it hurt someone or make them ill			
Kill or cause permanent ill health or disability	Extreme	Very High	High
Long term illness or serious injury	Extreme	High	Medium
Medical attention and days off work	High	Medium	Medium
First aid needed	Medium	Low	Low
